

Re-opening of the Climate chambers

Scientific meeting - Program

Friday January 30th 2015 – Auditorium in building 1262

- 9.00** Welcome, **Torben Sigsgaard**
- 09.05-09.30** The major contributions from chamber experiments to air pollution science - "High exposure short term studies" by **Thomas Sandström**
- 09.30-09.50** The major contributions from chamber experiments to indoor air quality science "Low exposure short term studies" by **Jakob Bønløkke**
- 09.50-10.10** Questions & coffee
- 10.10-10.35** The MOSES study: Multicenter Ozone Study in Elderly Subjects. What's it all about? Plus: Results from OZCARD: Cardiovascular Effects of Ozone in Young Healthy Subjects by **Mark Frampton**
- 10.35-10.50** Biostatistical challenges in the analysis of climate chamber data by **Bo Bibby**
- 10.50-11.10** Questions followed by coffee and refreshments
- 11.10-11.35** Future use of experimental chamber facilities; Ideas for an e-cigarette study by **Suzaynn Schick**
- 11.35-12.10** Past, present and future of experimental human air pollution studies: Focus on particulate matter by **Chris Carlsten**
- 12.10-** Questions and wrap up by **Torben Sigsgaard**
- Sandwich will be served after the morning program.
Please remember to sign up if you want sandwich
- The speakers will join the organizers in a discussion of ideas for future studies, prospects of funding of experimental studies, possible collaboration, and exchange of ideas. Participants are invited to join this discussion.
Alternatively participants are offered an extended visit to the renovated Climate chambers by technician Peter Ravn
- 13.30-** Reception at the Climate Chambers, Ole Worms Allé 6 – Bygning 1181, 8000 Aarhus C
Guided tours through the renovated chambers will be offered.
